Full-stack developer with 2 years of industry experience developing web applications using front-end and back-end skills like Javascript, HTML, CSS, React, Node, Auth0, AWS, and RESTful web services.

Professional Experience

Danielson, CT

- **Full-Stack Developer** *TextConnects* *November 2020 – Present*
 - Designed and developed an order fulfillment application handling over 200 orders monthly built using Javascript, Node, Express, HTML, CSS, and AWS firestore
 - Implemented a package tracking system to existing e-commerce platform serving over 10,000 customers by utilizing Javascript, Node, Express, and the UPS Quantum view API
 - Streamlined content creation, and management serving over 40 company clients by developing a CMS using Javascript, React, SASS, and JSON
 - Developed features for web applications, generating over \$300,000 in revenue within 1 year using Javascript, jQuery, CSS, HTML, REST APIs, and JSON
 - Improved render time for web applications from more than 10 seconds to fewer than 3 seconds by using lighthouse, optimizing images, file compression, and javascript deferment
 - Improved accessibility by 100% delivering ADA compliance using Javascript and HTML code
 - Delivered proprietary customer service system for more than 20 e-commerce clients leveraging Zendesk API, Javascript, Node, and Express

Norwood, MA

- **Front-End Developer** *UberJets* *January 2020 – November 2020*
 - Integrated third-party payment providers to build an in-house invoice system using Javascript, CSS, HTML, Stripe API and Salesforce functions, processing over 1,000 transactions monthly
 - Enhanced UI/UX increasing user engagement by 20% using Javascript, CSS, Airport location dataset, and HTML
 - Designed and built landing pages for marketing campaigns resulting in an increase of more than 50 memberships by using Javascript, CSS, and HTML

Personal Projects

- **FilmFlix** cedrickmonesit.github.io/film-flix/
 - Browse, bookmark your favorite movies, tv shows, and actors. A single page movie site with user account login, favorites list, and leveraging responsive design for mobile devices. Utilizing Javascript, React, Redux, Router, SASS, and TMDB API
- **Kixs** cedrickmonesit.github.io/kixs-client/
 - A single page sneaker site that shows information and msrp for Jordan sneakers. Features user login, favorites list, and responsive design for mobile devices. Developed using Javascript, React, Router, SASS, Node, Express, Auth0, AWS Firestore, and AWS Firebase storage
